ELSEVIER

Volume 209, Numbers 1–2, August 1997

WEAR

Contents

Studies to evaluate the extreme pressure and anti-wear activity of some thiuram disulphides, xanthogens and dithiocarbamates 1
S. Kumar, N.N. Roy

Synthesis, structure and lubricating properties of dialkyldithiophosphate-modified Mo–S compound nanoclusters 8
Z. Zhang, Q. Xue, J. Zhang

Analysis of hydrodynamic journal bearings lubricated with a binary water-based lubricant 13
M.B.W. Nabhan, G.A. Ibrahim, M.Z. Anabtawi

Metal gouging at low relative sliding velocities 21
K.R. Tarcza, W.F. Weldon

Wet abrasive wear of ordered Fe_3Al alloys 31
J.P. Tu, M.S. Liu

Study on loading capacity of the coating–substrate system of vapour-deposited TiN and TiC on bearing balls II. Rubbing method in experiments and analysis 37
W. Liqin, Q. Yulin, S. Baoyu

Erosion resistance of Ni–WC self-fluxing alloy coating at high temperature 43
J.P. Tu, M.S. Liu, Z.Y. Mao

Tribological behaviour of ion-implanted Ti6Al4V sliding against polymers 49
H. Schmidt, A. Schminke, D.M. Rück

Finite element analysis of subsurface crack propagation in a half-space due to a moving asperity contact 57
K. Komvopoulos, S.-S. Cho

Change of cylinder surface topography in the initial stage of engine life 69
P. Pawlus

Experimental measurement of the residual stress field within thermally sprayed rolling elements 84
R. Ahmed, M. Hadfield

Laser cladding coating against erosion–corrosion wear and its application to mining machine parts 96
P. Wang, Y. Yang, G. Ding, J. Qu, H. Shao

PVD coatings for lubricant-free tribological applications 101
O. Knotek, E. Lugscheider, C. Barimani, M. Möller

The friction and wear behaviour of polyamide 6 sliding against steel at low velocity under very high contact pressures 106
F. Van De Velde, P. De Baets

Analysis of aerodynamic multileaf foil journal bearings 115
D. Sudheer Kumar Reddy, S. Swarnamani, B.S. Prabhu

Thermal fluctuations at PTFE friction and transfer 123
Yu.M. Pleskachevsky, V.A. Smurugov

Effects of grain boundary on deformation due to scratching in α Cu–Al bicrystals having symmetrical $<111>$-tilt boundary 128
S. Kobayashi, K. Mori

A study in the tribochemistry of alkyldithiobiurets and their Mo–S complexes as EP additives 134
A.K. Tripathi, A. Bhattacharya, V.K. Verma

The influence of stacking fault energy on the wear resistance of nickel base alloys 140
D.K. Chaudhuri, D. Xie, A.N. Lakshmanan

Study of abrasion behavior of an advanced Al_2O_3–TiC–Co ceramic 153
D.S. Mao, J. Li, S.Y. Guo, Z.Y. Mao

Elsevier Science S.A.

The influence of niobium, chromium, molybdenum and carbon on the sliding wear behavior of nickel-base hardfacing alloys 160
Y.L. Su, K.Y. Chen

Unlubricated sliding wear of steels: towards an alternative wear equation 171
D.W. Borland, S. Bian

Low invasive propulsion of medical devices by traction using mucus 179
K. Ikeuchi, K. Yoshinaka, N. Tomita

An experimental investigation into the design and performance of hydrostatically loaded floating wear plates in gear pumps 184
E. Koç, C.J. Hooke

A study of the inhibitive effect of Mo on the temper softening of bearing surfaces caused by ion implantation 193
H. Jin, M. Sakai, C.L. Wu, J.C. Jin

The effect of electroless nickel film on the tribological characteristics of alumina coatings 199
J.F. Lin, J.C. Lian, K.Y. Li

Effect of glass-crystalline and amorphous binder application to abrasive tools made of microcrystalline alumina grains type SG 213
D. Herman, J. Plichta, T. Karpiński

Some remarks concerning scuffing of ceramics slid against steel 219
E. Kwaśniak, J. Pasierski, J. Stupnicki

Hard particle erosion of silicon carbide and silicon carbide–titanium diboride from room temperature to 1000 °C 229
A.F. Colclough, J.A. Yeomans

Experimental procedure for the evaluation of the friction energy of lubricating greases 237
E. Kuhn, C. Balan

Investigations of the wear of cubic boron nitride cutting tools using Auger electron spectroscopy and X-ray analysis by EPMA 241
M. Zimmermann, M. Lahres, D.V. Viens, B.L. Laube

Stress distributions at the abrasive–matrix interface during tool wear in bound abrasive grinding—a finite element analysis 247
Y. Zhou, P.D. Funkenbusch, D.J. Quesnel

Wear characteristics of a hardfaced steel in slurry 255
R. Dasgupta, B.K. Prasad, A.K. Jha, O.P. Modi, S. Das, A.H. Yegneswaran

Wear and CO_2 corrosion of steel couplings and tubing in heavy oil screw-pump wells 263
A. Hedayat, S. Yannacopoulos, J. Postlethwaite

Traction coefficient in a roller–inner ring EHD contact in a jet engine roller bearing 274
A. Sottomayor, A. Campos, J. Seabra

Modeling of jetflow drilling with consideration of the chaotic erosion histories of particles 284
Z. Yong, R. Kovacevic

Modified average Reynolds equation for ultra-thin film gas lubrication considering roughness orientations at arbitrary Knudsen numbers 292
W.-L. Li, C.-I. Weng

Tribological studies of plasma source ion nitrided low alloy tool steel 301
M.K. Lei, P. Wang, Y. Huang, Z.W. Yu, L.J. Yuan, Z.L. Zhang

Impact–abrasion behavior of low alloy white cast irons 308
M. Qian, W. Chaochang

The effect of nanometer SiC filler on the tribological behavior of PEEK 316
Q.-H. Wang, J. Xu, W. Shen, Q. Xue

Study of dry friction under small displacements and near-zero sliding velocity 322
J.F. Ferrero, J.J. Barrau

Characterisation of surface roughness by laser light scattering: specularly scattered intensity measurement 328
J.C. Le Bosse, G. Hansali, J. Lopez, T. Mathia
